

Shrimperfect™ Prawnto™ Shrimp Machine

*The Most Profitable Way to
Process Shrimp!*

We manufacture the **Shrimperfect™ Prawnto™** shrimp cutter and deveiner, the most dependable piece of equipment of its kind on the market today. Because it is powered by a ¼ hp. motor and constructed of aluminum and stainless steel, and high quality standards are used in the manufacturing processes, we offer a 1-year warranty. Shrimp deserve to be processed **Shrimperfect™**.

What exactly does the PRAWNTO™ do?

It cuts the shrimp down the back to any depth while destroying most of the sand vein. The shell is then easily removed by "pinching" or pulling it off from the underside. The tail can be removed or left on for any presentation required.

What about cutting different sizes of shrimp?

Here is the beauty of the **Prawnto™**... It's easily adjusted for different sizes and with our patented roller system only the depth knob is necessary for different depths of cut.

Can the PRAWNTO™ butterfly?

Yes. The cut will be deep in the front to fan the shrimp for better presentation while stopping at the tail section for efficient breading or skewering. Round cut and western cuts are 2 additional cuts made by the **Shrimperfect™ Prawnto™**.

What are the size ranges the PRAWNTO™ can handle?

U8 down to 150 count green headless product. Head-on shrimp can also be run through the **Prawnto™**.

Will there be any damage or miss-cut shrimp?

NO. With proper alignment, simple maintenance, and cleaning, the cutting blade will always cut down the center of the shrimp's back each and every time.
